

IN THE CLAIMS

1. (Twice amended) A method of combatting fungi and enhancing turf quality in turfgrass which comprises applying to said turfgrass synergistic fungicidally effective amounts of:

(a) a first active agent selected from the group consisting of

(i) 1 part by weight of a monoester salt of a phosphorous acid of Formula (I):

wherein:

R is an alkyl radical having 2 to 4 carbon atoms,

Me is an alkali metal, alkaline earth, or aluminum atom, and

n is a whole number from 1 to 3 equal to the valence of Me; and

(ii) phosphorous acid or an alkali or alkali earth metal salt thereof; and

(b) from 0.01 to 0.1 parts by weight of a phthalocyanine compound,

wherein said method does not include the application of an ethylenebisdithiocarbamate contact fungicide.

10. (Thrice amended) A fungicidal composition [tier] for enhancing turf quality wherein the active material [which

comprises] present in synergistic fungicidally effective amounts
consists essentially of [of an active material comprising]:

(a) 1 part by weight of a first active agent selected
from the group consisting of

(i) a monoester salt of a phosphorous acid of
Formula (I):

wherein:

R is an alkyl radical having 2 to 4 carbon atoms,

Me is an alkali metal, alkaline earth, or aluminum
atom, and

n is a whole number from 1 to 3 equal to the valence
of Me; and

(ii) phosphorous acid or an alkali or alkali earth
metal salt thereof; and

(b) from 0.01 to 0.1 parts by weight of a
phthalocyanine compound

wherein the composition does not include an
ethylenebisdithiocarbamate contact fungicide.

38. (New) The composition according to claim 32, wherein
said composition is a wettable powder.
